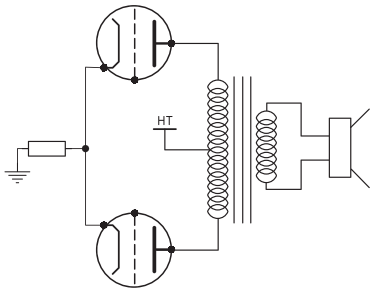
Emulated output and headphones
Stereo sound via headphones or Y-lead

MP3 / line input
Stereo input great for practising

Push-Pull



The HT-1 power amplifier is a low powered push-pull design which produces the crunch and break-up characteristics of a traditional 100W output stage, but at a much lower volume. This is achieved by the use of an ECC82 dual triode valve in push-pull configuration producing 1 Watt output, which is rich in valve harmonics and compression, sounding full and toneful even at the lowest volume level.

USA to UK in seconds

ISF (Infinite Shape Feature)

Unique patent-applied-for Infinite Shape Feature (ISF) allows access to infinite new sounds.
